Art Unit: 2833

Claims 1-39 are objected to because of the following informalities: the preamble of each independent claim recites "An electrostatic discharge *for use in* an enclosure" (italics added)(implying that the enclosure is not a part of the system), then goes on to positively recite the enclosure as being part of the electrostatic discharge system in the body of the claim. This is inconsistent. Appropriate correction is required.

Claims 1-39 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record discloses or teaches a ground pin capable of engaging and deforming an electrically conductive gasket upon insertion of a circuit board into an enclosure and prior to electrical connection of the circuit board with a backplane.

The references cited on Form 892 disclose similar grounding systems.
